WEB-101 Intro

Congrats on clearing JS 101, and welcome to new course WEB-101.

WEB-101 Syllabus:

- HTML Introduction
- CSS Styles & Box Model
- CSS Selectors
- CSS Combinators
- CSS Flex
- CSS Grid
- Media Queries & CSS Positions
- Higher Order Functions
- Document Object Model
- Local Storage
- E-commerce Website
- GIT and Github

WEB-101 Content:

- Pre-class Videos
- Pre-class Notes
- Pre-class Quiz
- Live-class
- WE session
- Assignments
- Evaluations

Pre-class Videos:

- Pre-class videos will be released one day before at `8pm` .

- Duration will be < **30mins**.

- It includes topics which we will be discussed in the next day session.

- **Importance of Pre-class videos**

  - You will get an idea on what you are going to learn in next session.

  - It will help you grasp concepts quickly in live session.

  - It will allow us (instructors) to teach you more examples in live session.

  - It will help us in understanding the topics in which you are facing issues, so that we can spend more time on those topics.

- So make sure you watch pre-class videos before attending live-session.

Pre-class Notes:

- Pre-class Notes will be released along with pre-class videos.

- Reading time will be < **15mins**.

- It includes topics discussed in pre-class.

- It will also provide you some examples so that you can try it while watching pre-class videos.

- It also helps you during revision time.

Pre-class Quiz:

- Pre-class Quiz will be released everyday at **2pm**.

- It will be of **MCQ** type.

- Total Questions : **10-15**

- Expected solving time : **15mins.**

- It's **mandatory** for everyone to attempt it before attending live session so that we will get to know the topics in which you are facing issues.

Live-session:

- Live-session will start everyday at **3pm.**

- First **15mins,** we will discuss quiz questions and issues which most of you have faced.

- After that we will jump into concept and examples.

- We will also have a **WE session** in which we will solve layout or question statement releated to that day's topic.

- Make sure you are attending live session on time, live session link will be available around **2:50pm**

Assignments:

- Assignments will be released everyday at **5pm**.

- You will get around 2-3 questions per day as assignments.

- Never take pressure on completing all questions in assignments, end goal shouldn't be 100% assignment completion, but 100% conceptual understanding.

- So it is ok even if you solve 2 out of 3 questions, but make sure you have complete understanding on what to solve.

- Also note that **TOP STUDENTS IN MASAI has average of 65% assignment submission rate**.

- And even if you have pending assignments, first try to solve atleast 60% of current day assignments and then go for pending assignment.

Evaluations:

- You will have weekly evaluations on Monday.

- We will test you on that entire week concepts.

- More instructions regarding each evaluation will be given to you on evaluation day.

DO's and Dont's:

- Don't involve in any type of plagarism.

- Don't share or receive code from anyone, it may lead to termination.

- Don't join any whatsapp groups or any social media groups, slack is the only official communication channel during entire masai course.

- Use slack channels to ask questions, and help others(but not during evauluation).

- Never spam messages in live session or slack.

- Use your IAs effectively, ask every doubt even if you feel it is small.

- Always reach out to your EC if you face any trouble.

Happy Learning 😊
